

INSTAFOREX

MT4 MOBILETRADER

The MobileTrader platform is a trading application that runs on any mobile device with Internet access. The platform offers traders all the tools that are available in the desktop version, displaying them in an easy-to-navigate form.

Reading this course you will learn about:

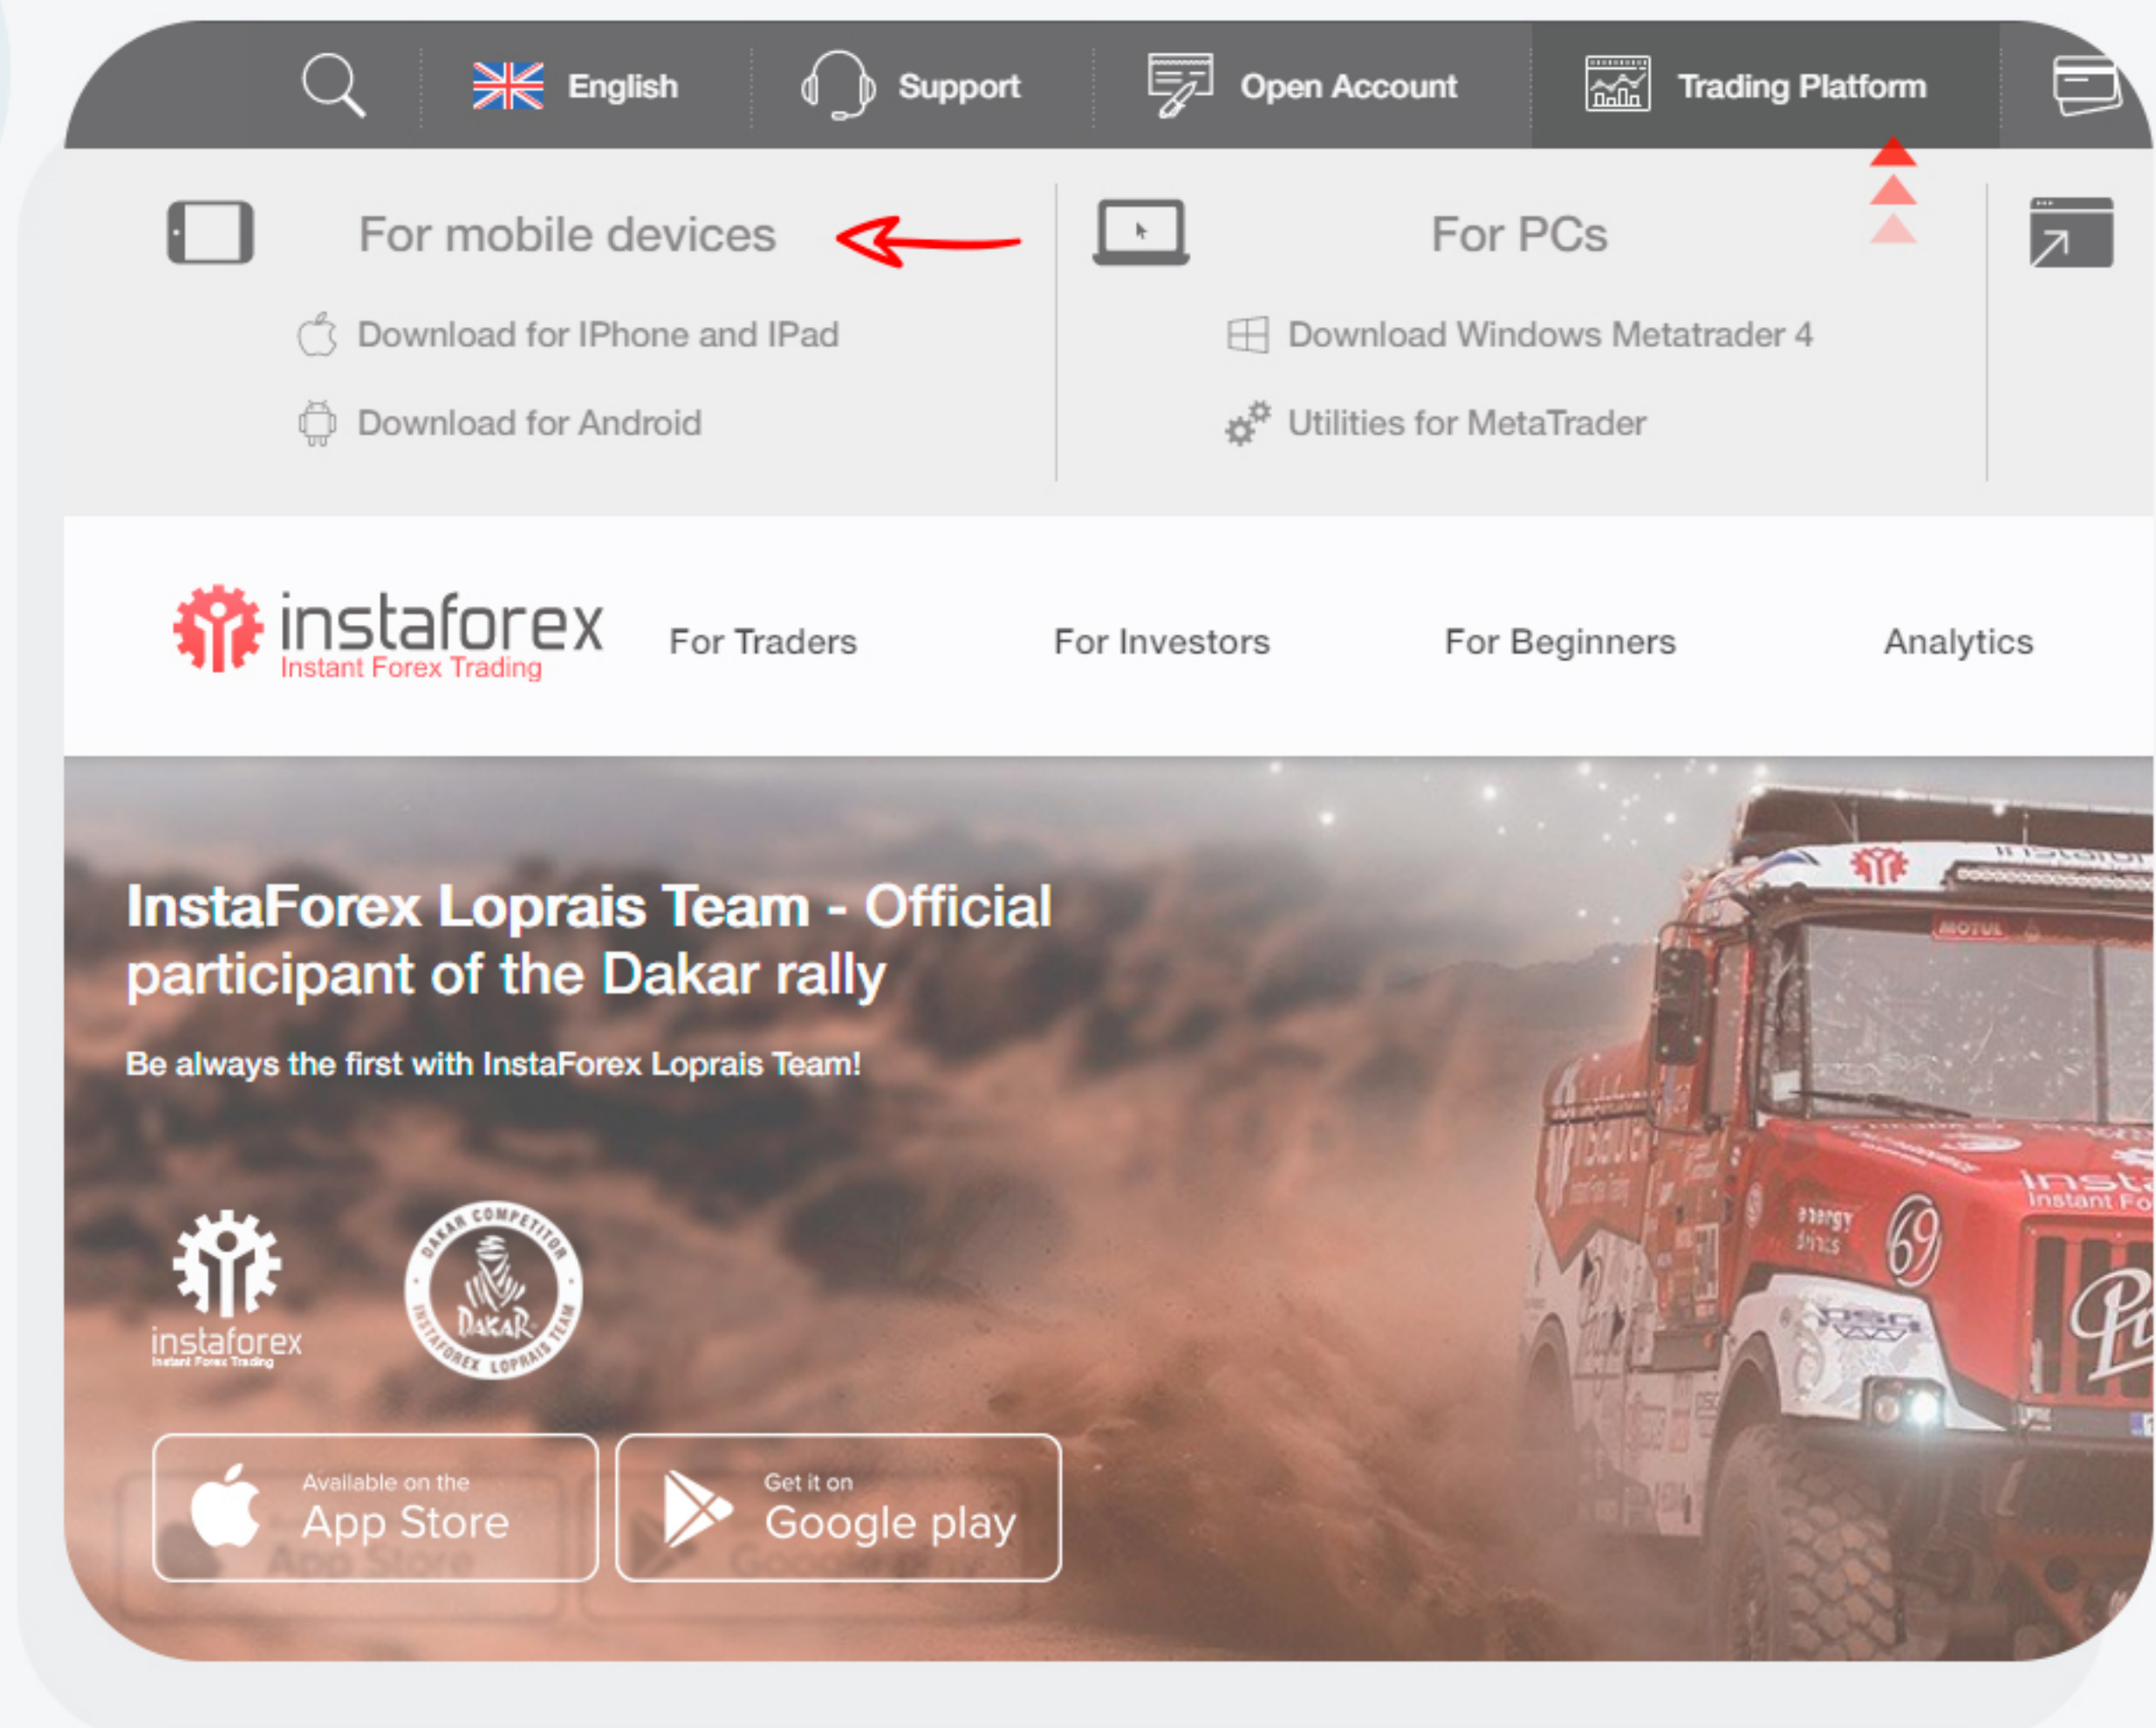

- How to start
- App overview
- Opening a position
- Indicators
- Time Frames
- Linear tools
- Modifying an order
- Closing a position

How to start

To install MobileTrader, you need to find and download the application in Google Play or App Store. Or follow the Download for Android / Download for iPhone and iPad link on the [instaforex.eu](https://www.instaforex.eu) in the [Trading Platform](#) tab.

To start trading, you need to log in using your credentials if you already have a trading account. You can also open a new account. Moreover, you can register a free demo account and try your hand at trading with no risk of losing real money.

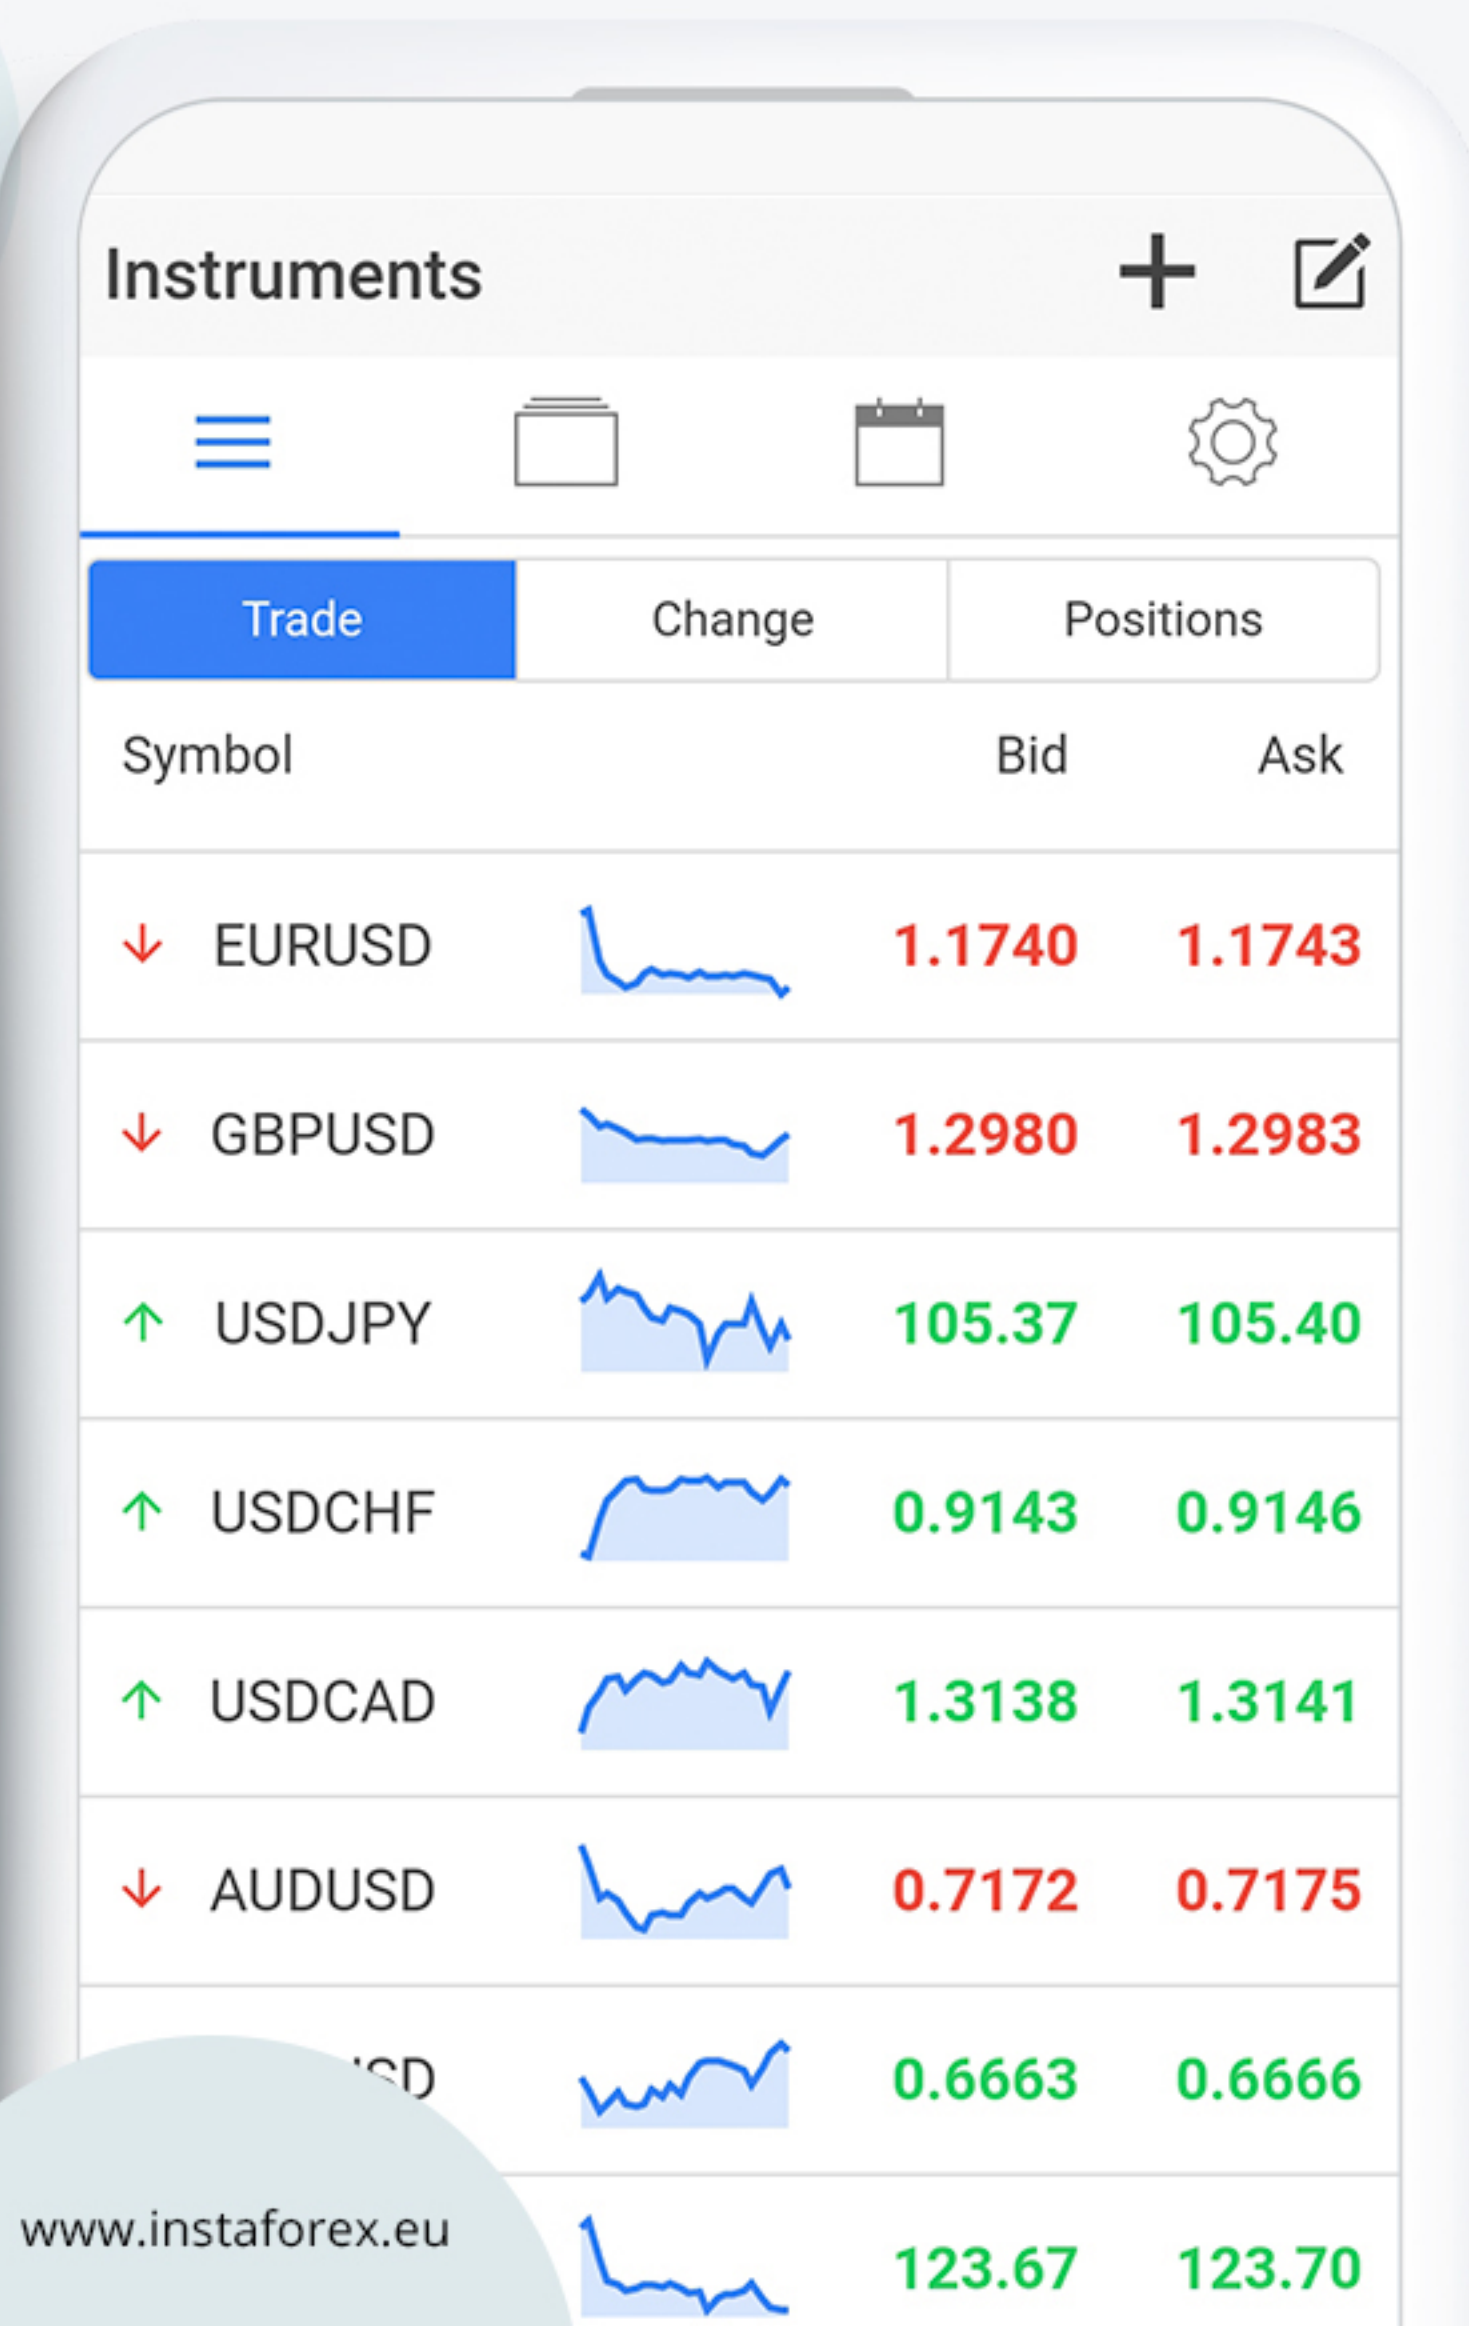

The screenshot shows the InstaForex website interface. At the top, there is a navigation bar with icons for search, language (English), support, open account, trading platform, and a user profile. Below this, there are two main sections: 'For mobile devices' and 'For PCs'. The 'For mobile devices' section has a red arrow pointing to it, and it contains links for 'Download for iPhone and iPad' and 'Download for Android'. The 'For PCs' section contains links for 'Download Windows Metatrader 4' and 'Utilities for MetaTrader'. Below these sections, there is a banner for the 'InstaForex Loprais Team - Official participant of the Dakar rally'. The banner includes the InstaForex logo, the Dakar Competitor logo, and buttons for 'Available on the App Store' and 'Get it on Google play'.

App overview

There are four tabs in MobileTrader:

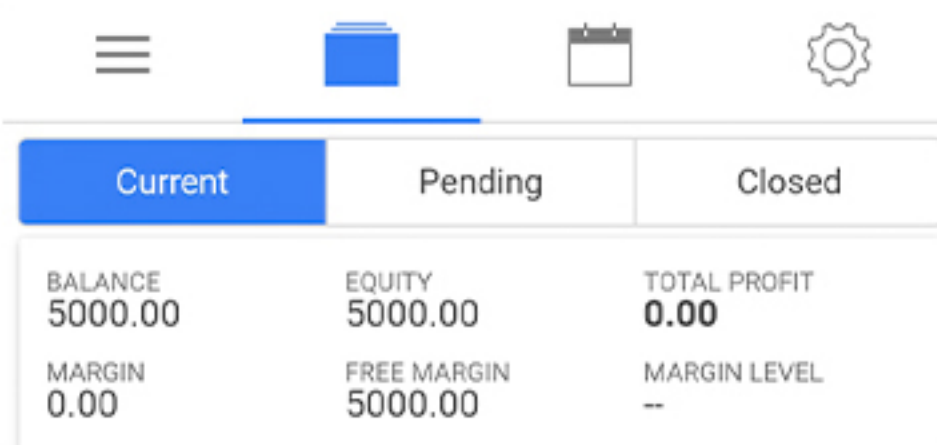

1. **Instruments** (All instruments available for trading)
2. **Trades** (A List of all your trades and account status)
3. **Analysis** (Analytical articles from InstaForex experts and company news)
4. **Settings**

The screenshot shows the 'Instruments' tab of the MobileTrader app. It features a header with a menu icon, a folder icon, a calendar icon, and a settings icon. Below the header, there are three tabs: 'Trade' (selected), 'Change', and 'Positions'. The main content area is a table with columns for 'Symbol', 'Bid', and 'Ask'. The table lists several currency pairs with their respective bid and ask prices and small line charts showing price movement.

Symbol	Bid	Ask
EURUSD	1.1740	1.1743
GBPUSD	1.2980	1.2983
USDJPY	105.37	105.40
USDCHF	0.9143	0.9146
USDCAD	1.3138	1.3141
AUDUSD	0.7172	0.7175
USD	0.6663	0.6666
USD	123.67	123.70

Trades

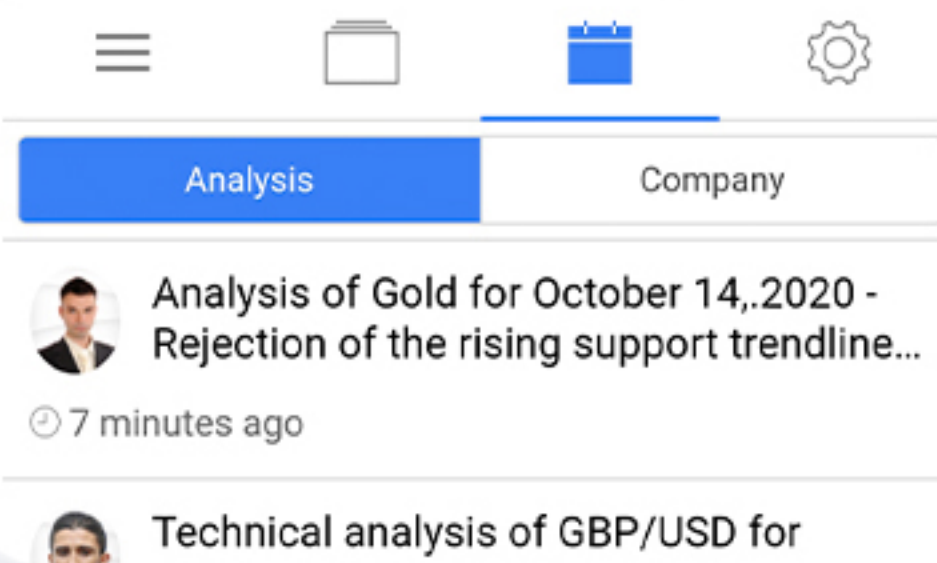

The screenshot shows the 'Trades' tab of the MobileTrader app. It features a header with a menu icon, a folder icon, a calendar icon, and a settings icon. Below the header, there are three tabs: 'Current' (selected), 'Pending', and 'Closed'. The main content area displays account information in a table format.

Current	Pending	Closed
BALANCE 5000.00	EQUITY 5000.00	TOTAL PROFIT 0.00
MARGIN 0.00	FREE MARGIN 5000.00	MARGIN LEVEL --

No current trades

Analysis

The screenshot shows the 'Analysis' tab of the MobileTrader app. It features a header with a menu icon, a folder icon, a calendar icon, and a settings icon. Below the header, there are two tabs: 'Analysis' (selected) and 'Company'. The main content area displays a list of analytical articles with a profile picture, title, and timestamp.

Analysis	Company
 Analysis of Gold for October 14, 2020 - Rejection of the rising support trendline... 7 minutes ago	 Technical analysis of GBP/USD for

Opening a position

To open a position, tap on the symbol desired to place an order in the Instruments tab.

Before opening a trade, you can study the instrument chart. By default, this is a candlestick chart.

A candlestick chart can be extended to widescreen if you bring your smartphone in a horizontal position.

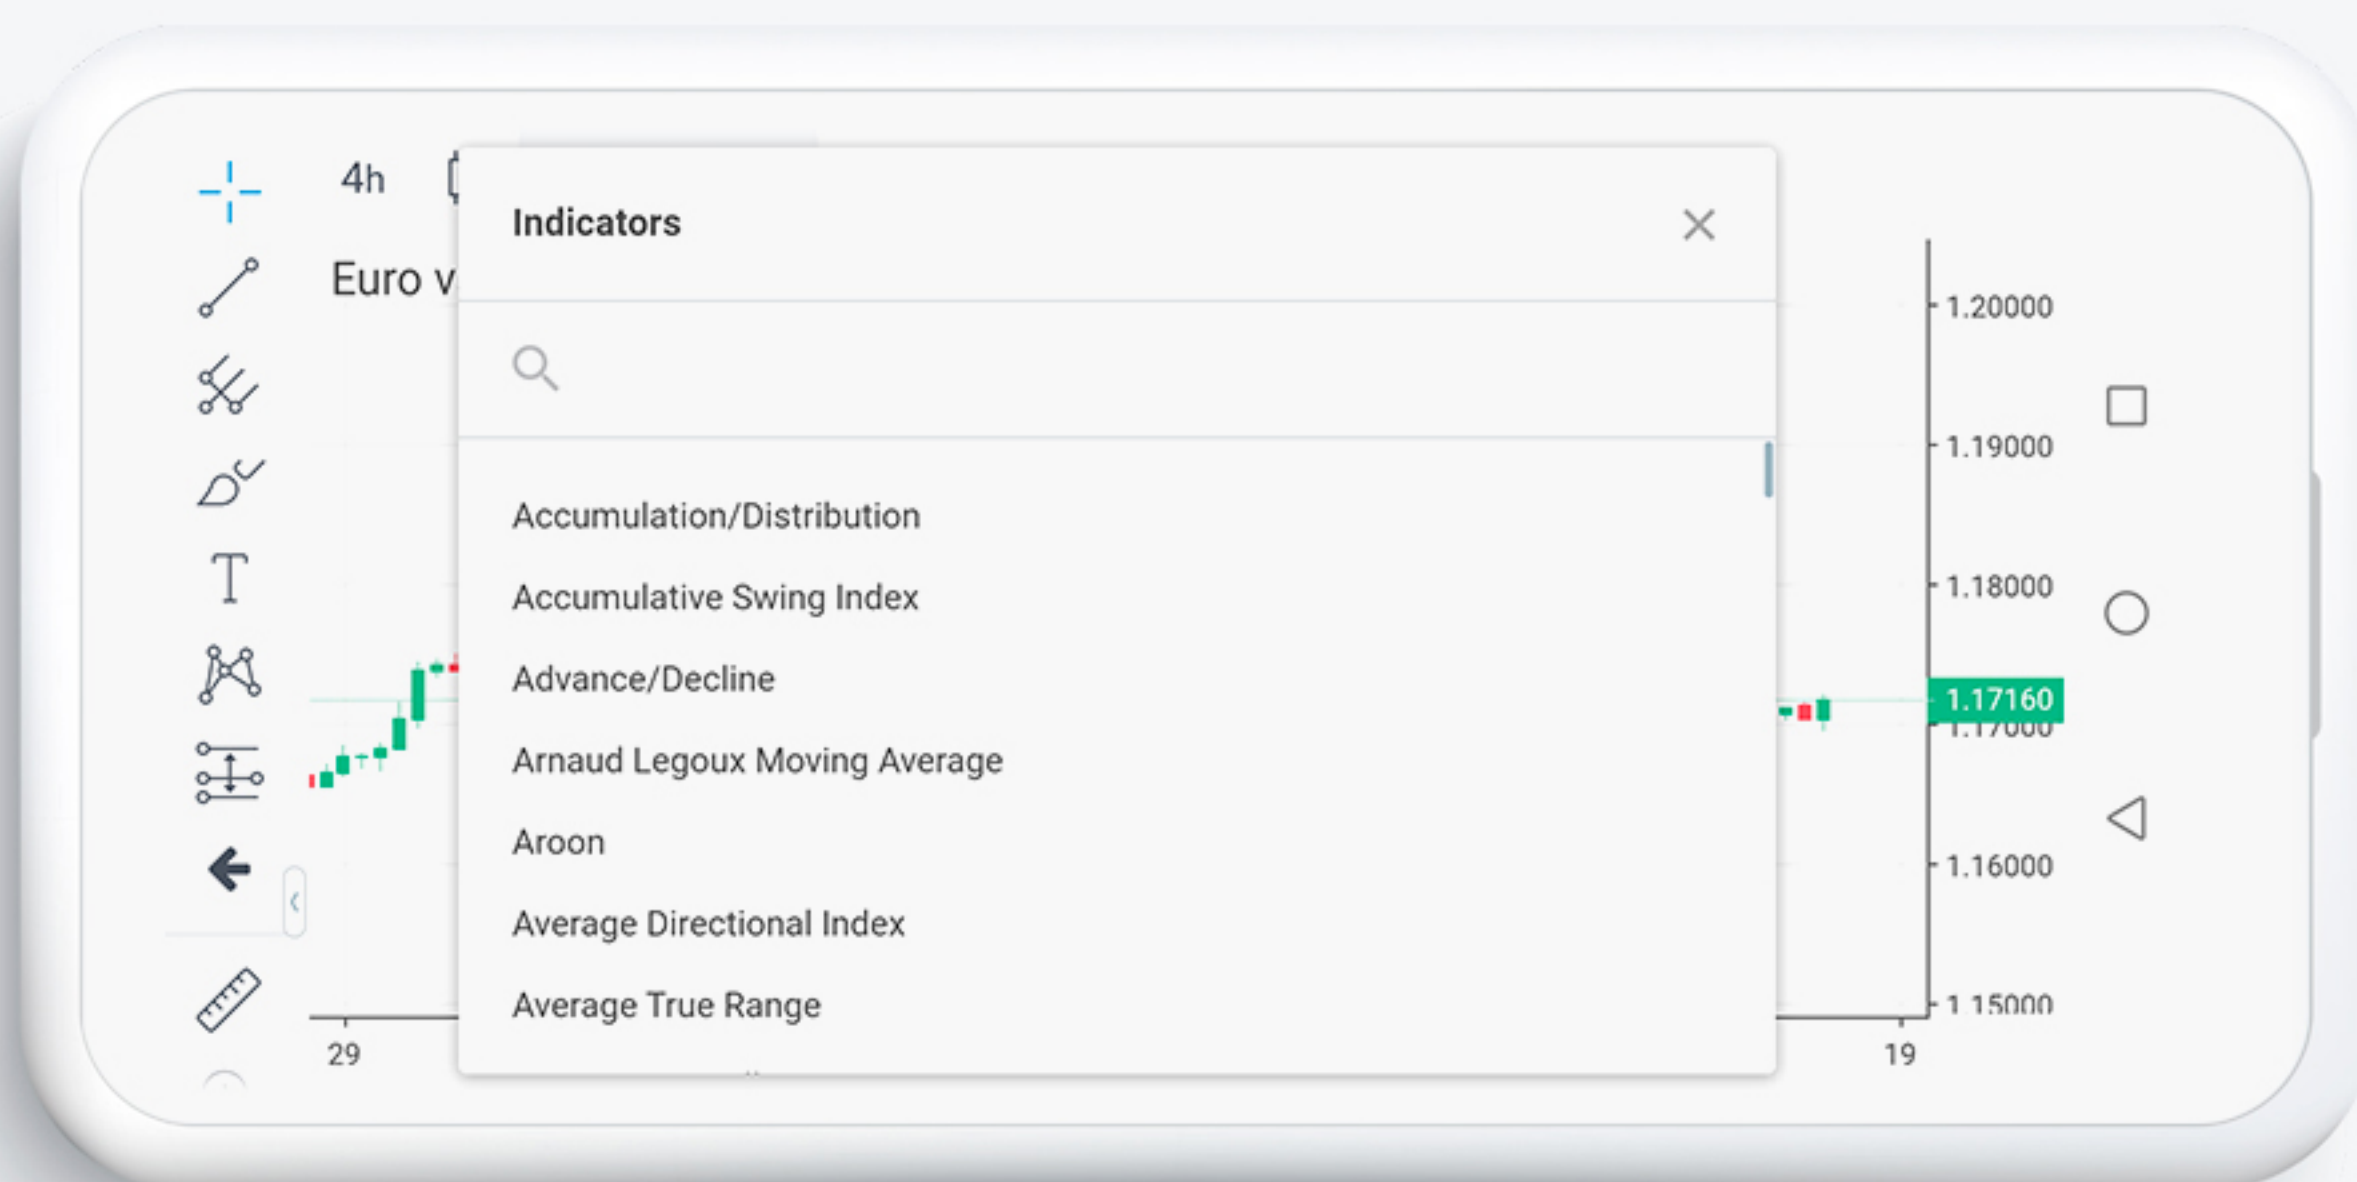

Make sure you have
screen rotation enabled

Indicators

Technical indicators are chart analysis tools that can help traders better understand price movements and react to them. There is a huge range of technical analysis tools available that analyze trends, provide price averages, measure volatility and perform other functions.

To add technical indicators to a chart, tap the Indicators button in the price chart.

Once you have found the indicator you wish to add, tap on it, and the indicator will now appear on the price chart. To remove the indicator, tap  next to the indicator display on the chart.

Time Frames

Time frames are different time periods which can be used to view how a price moved or is moving. Also traders can forecast future price movements on different time frames.

The user can choose the time periods for each line to represent, from 1, 5, 15, 30 minutes, 1 hour, 4 hours, 1 day, 1 week and 1 month.

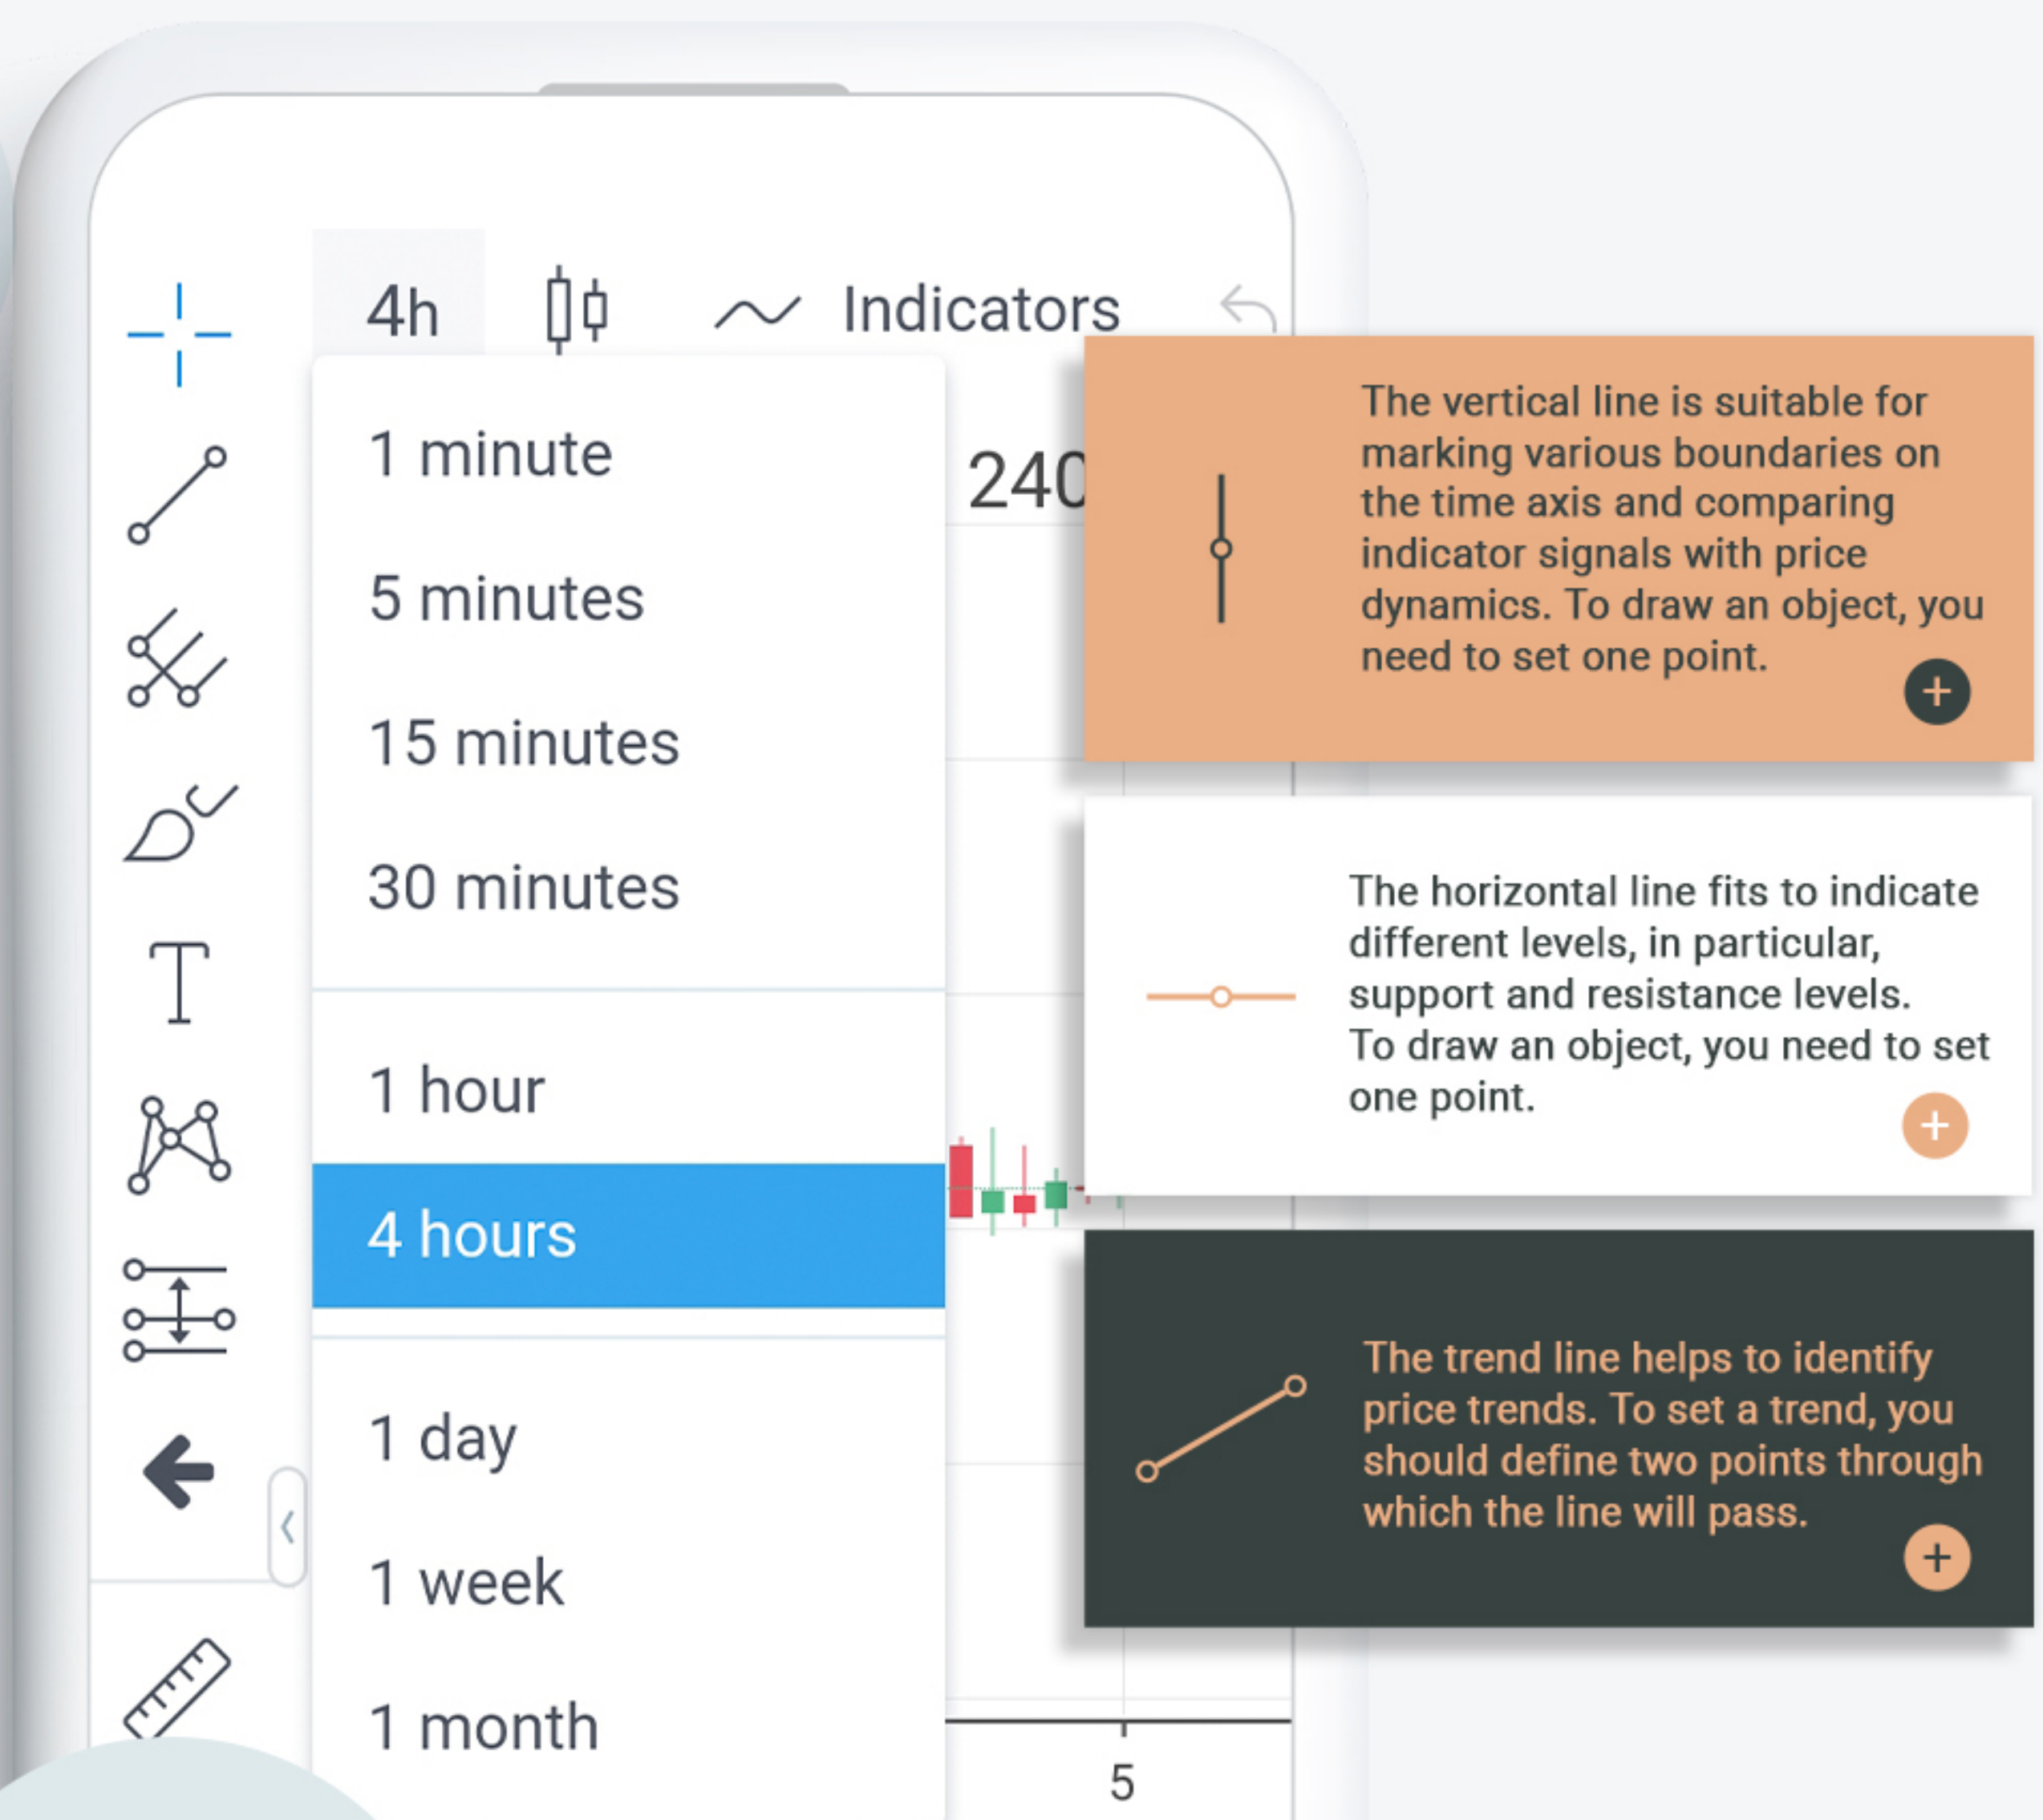

To add Time Frames, tap the Time Frames button in the price chart.

Linear tools

Linear tools are called lines and various geometric shapes that are plotted on price or indicator charts. These include support / resistance lines, trend lines, as well as Fibonacci instruments, etc.

Linear instruments are located on the left side of the screen. To draw a tool, you need to tap on the corresponding button.

The screenshot shows the Instaforex mobile app interface. On the left, a vertical menu lists various timeframes: 1 minute, 5 minutes, 15 minutes, 30 minutes, 1 hour, 4 hours (highlighted in blue), 1 day, 1 week, and 1 month. Above this menu, there are icons for a plus sign, a vertical line, a horizontal line, a trend line, and a ruler. The main area of the app displays a candlestick chart with a price of 240 and a time of 5. Three informational boxes are overlaid on the right side of the screen, each describing a linear tool:

- Vertical line:** The vertical line is suitable for marking various boundaries on the time axis and comparing indicator signals with price dynamics. To draw an object, you need to set one point.
- Horizontal line:** The horizontal line fits to indicate different levels, in particular, support and resistance levels. To draw an object, you need to set one point.
- Trend line:** The trend line helps to identify price trends. To set a trend, you should define two points through which the line will pass.

In MobileTrader there are two ways of making deals:
Instant Execution and Pending Order.

Instant Execution means you enter the market immediately after sending an order to your broker.

A Pending Order is a request made by a trader to a broker, it signals at what price level it is necessary to open or close a position.

Once you have decided to buy or sell at the current price click Sell or Buy to open a long or short position.

Before you enter the market you can change the details in the Order window:

- Order type - Instant Execution/Pending Order;
- Volume - number of lots;
- S/L - the level of Stop Loss order;
- T/P - the level of Take Profit order (To set stop loss and take profit levels, you need to activate the Show S/L and T/P settings button in Settings tab);

Click Sell or Buy to place the order.

Click OK to complete the order when the confirmation of the order appears.

MODIFYING AN ORDER

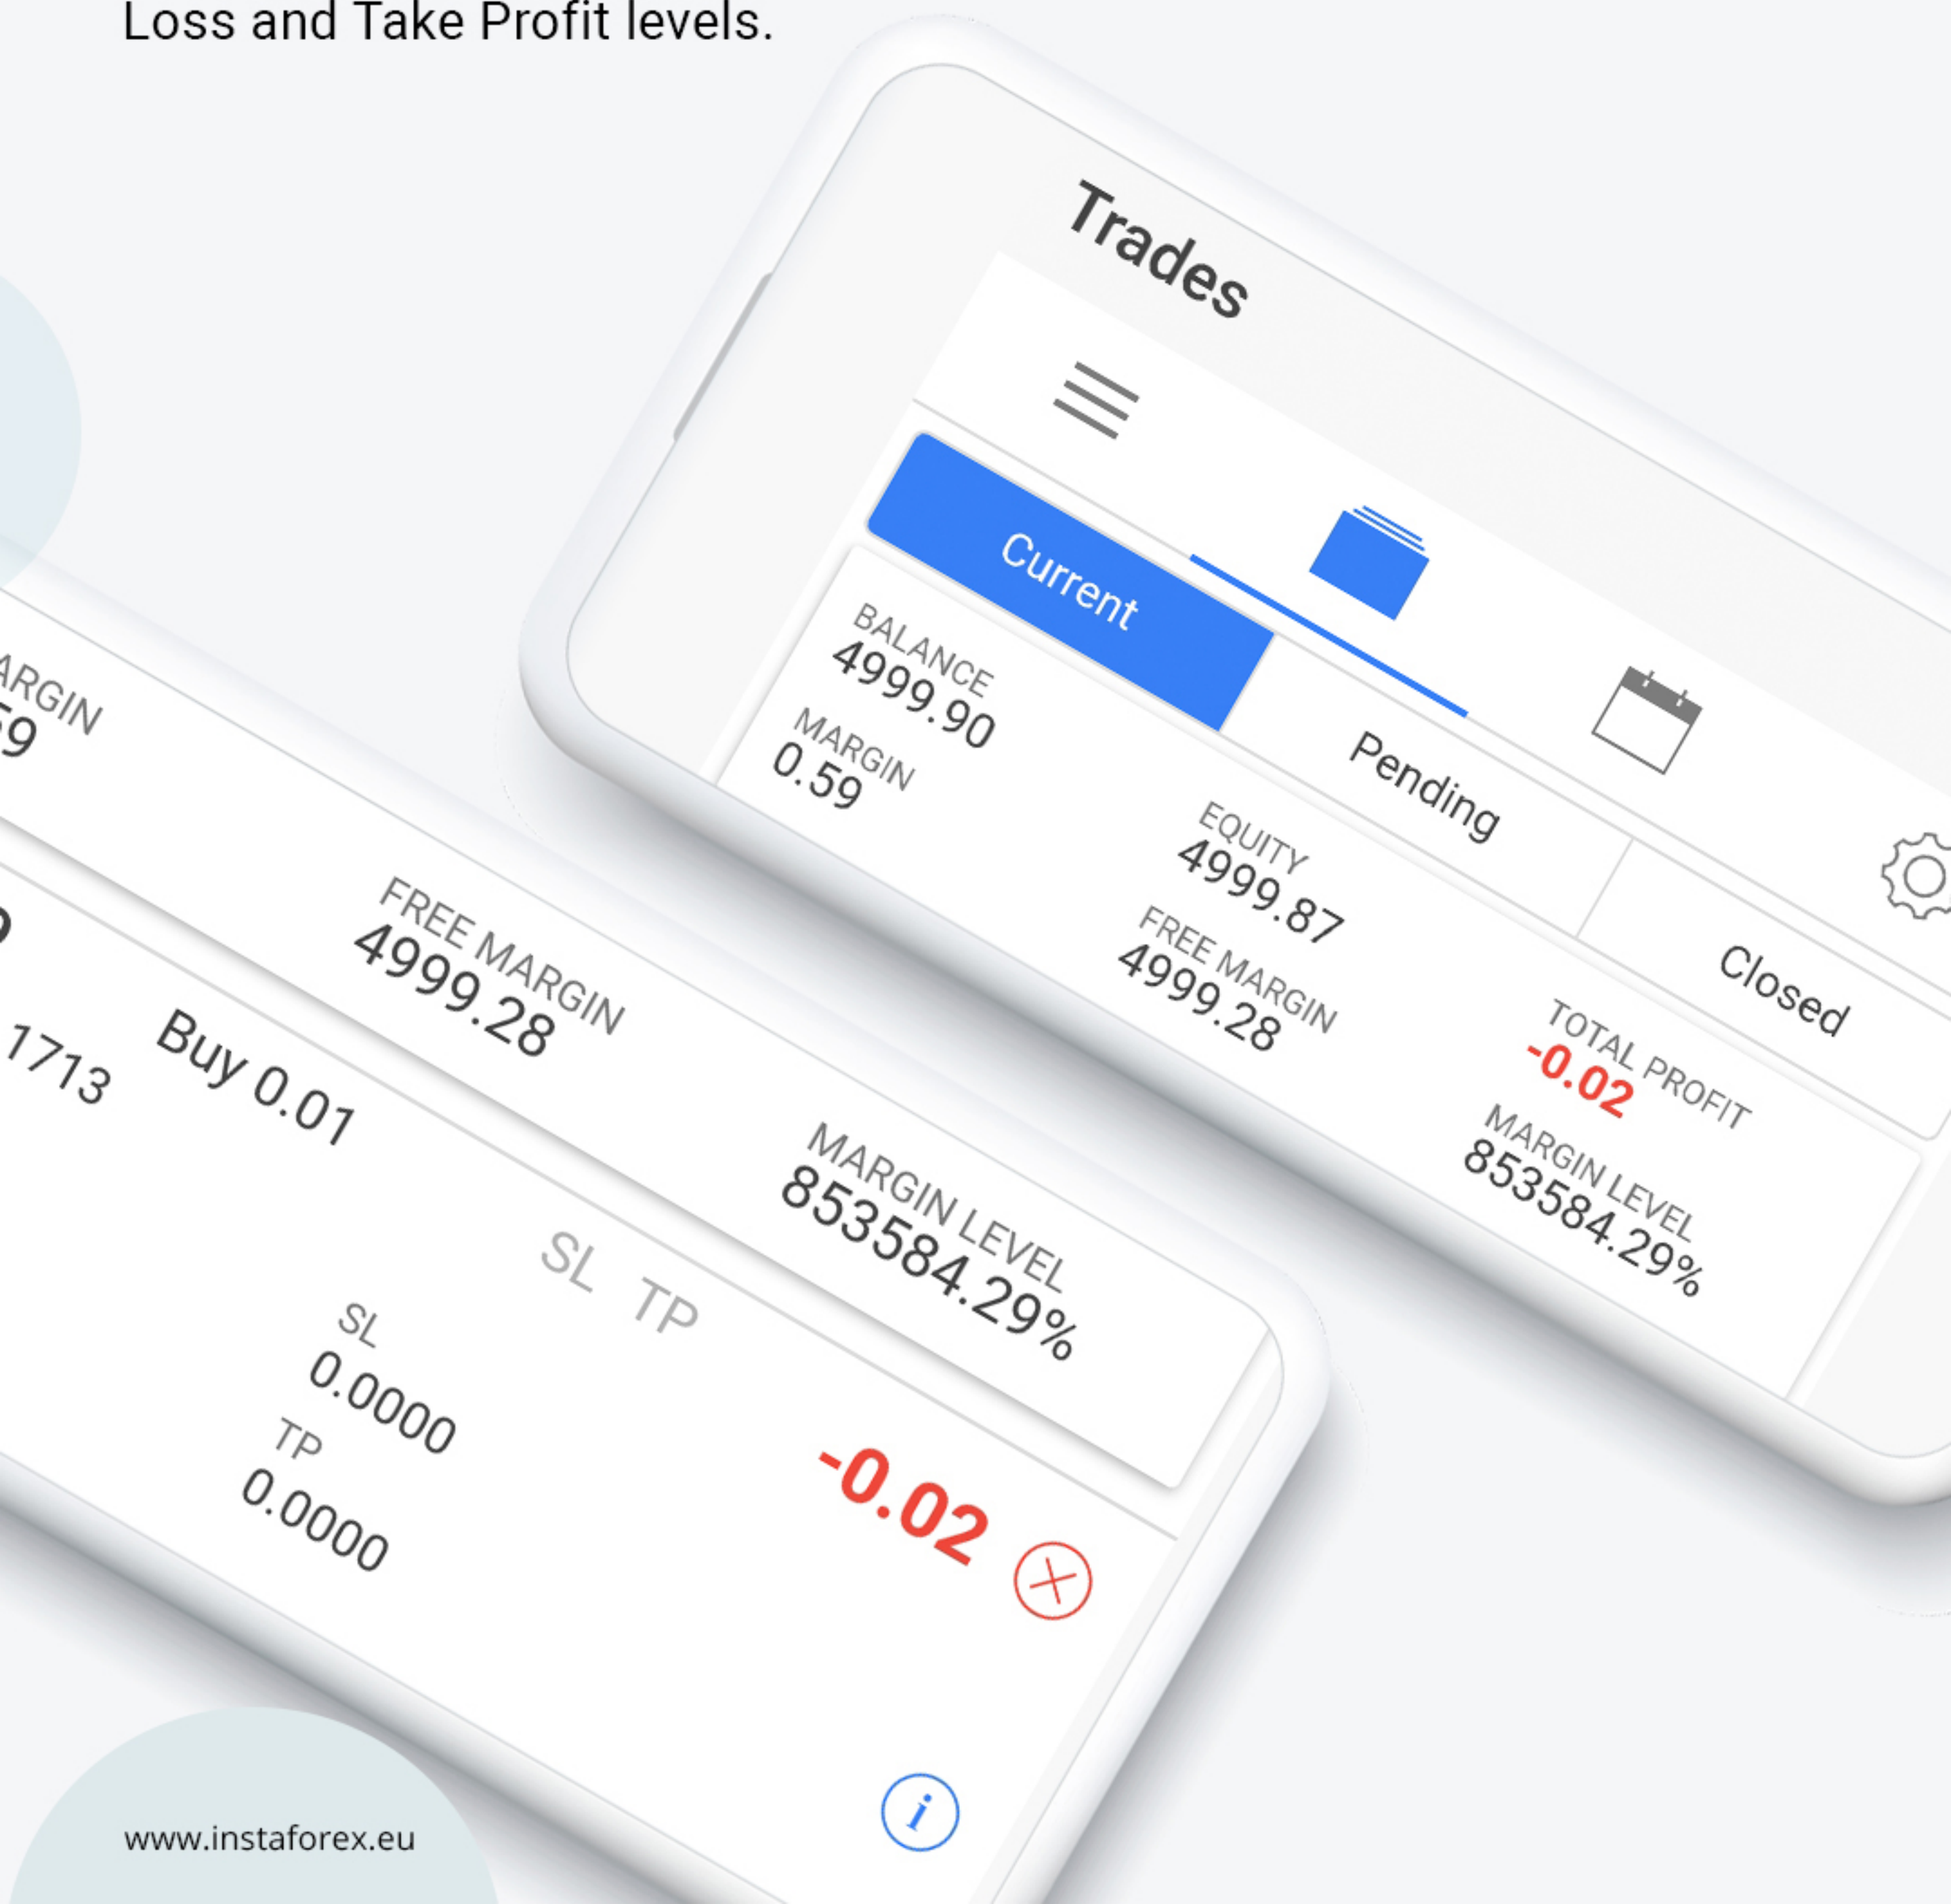

To modify an order, open the Trades tab, find the required order and tap on the  icon.

Here you can change the Stop Loss and Take Profit levels.

CLOSING A POSITION

To close a position, open the Trades tab, find the required order and tap on the  icon.

Tap OK to complete the action.
